Statement of RoHS compliance

Any of our products that are marked "RoHS" on the label (or printed circuit board for products without an enclosure) comply with the requirements of the European Union's RoHS Directive, 2002-95-EC. Any item not marked "RoHS" may contain lead and/or other materials in excess of the RoHS directive.

Our suppliers of components, enclosures, and hardware have confirmed their compliance with the RoHS directive. Based on the information that we've received from them, heavy metals and heavy metal compounds of lead (Pb), cadmium (Cd), mercury (Hg), hexavalent chromium (CrVI), and flame retardant systems based on polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE), are not intentionally employed in the manufacture of subject products exceeding the acceptable amounts.

Lead Free products

We use lead-free solder and components in all products that are marked "RoHS", but we can not assure there are no traces of lead in the product as they are made in a facility that also uses lead-based solder. We strive to make our products lead free but we can only certify lead-free on a custom basis.

California Proposition 65 warning

The following information is required by the State of California's Safe Drinking Water and Toxic Enforcement Act of 1986, or Proposition 65. This California regulation does not address safe levels, anything detectable at any level counts; therefore, even trace amounts of the chemicals included on Proposition 65's list of chemicals known to the State of California to cause cancer or reproductive toxicity must be noted with the "Safe Harbor" wording. A "Green", "lead free" and/or RoHS device will probably still have detectable quantities of some chemical on this list.

WARNING: This product contains lead and/or other chemicals known to the State of California to cause cancer and/or birth defects and/or other reproductive harm.
